

NEOMORE

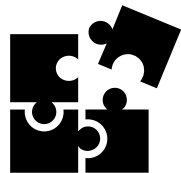

NEOMORE SOLUTIONS **MASTER DATA SUITE**

Clean core all the way

SOLUTIONS

- Ready-to-use SaaS applications running on SAP BTP platform
- Published in SAP Store and SAP Industry Cloud
- Clean core, no coding required in SAP
- Co-innovation together with customers

Neomore Master Data Suite

v.1 Material master data

- Digitalizes and harmonizes the material master management process
- Provides unified and centralized tool for entire organization
- Flexible but formalized approval workflow with email notifications
- Organization specific e.g., factory specific, fields
- Traceability and logs

BUSINESS CASE - MATERIAL MASTER DATA

Master Data plays a pivotal role in organizations spanning various industries and sectors.

Thus, Master Data Management (MDM) is important to maintain consistency, accuracy, and reliability of critical data across an organization. It integrates and standardizes core data such as customer, product, or supplier information.

BUSINESS CASE - MATERIAL MASTER DATA

CHALLENGE: MASTER DATA QUALITY

- *Inaccurate Reporting and Decision Making*
 - *Operational Inefficiencies*
 - *Compliance Risks*
 - *Customer Dissatisfaction*
 - *Increased IT Costs*
 - *Supply Chain Disruptions*
 - *Difficulty in System Integration and Upgrades*
 - *Reduced Trust in Data*
-

SOLUTION

- **GUIDE** user for correct data input
 - **VALIDATE** data automatically, rule-based
 - **APPROVE** complete data by correct persons
-

MASTER DATA SUITE IN BRIEF

ROLE-BASED FUNCTIONALITIES

- Requester
 - Request new material creation

MASTER DATA SUITE IN BRIEF

FEATURES

- Configurable approval flow for material requests
- Set approvers per data area
- Configurable business rules
 - Input value set filtering
 - E.g. limit material types to be requested
 - Value input rules
 - Set mandatory fields, default values

The screenshot shows the SAP Business Rules configuration interface. At the top, there is a navigation bar with a back arrow, the SAP logo, and a dropdown menu labeled "Business Rules". Below this, the title "Approval Rules" is displayed. To the right of the title, there is a "Select table" dropdown menu set to "Approval Rules", and buttons for "Export", "Import", and "Add". The main area contains a table with three columns: "Description", "Level", and "Areas". The table lists several business rules, each with a description, a level, and a set of areas. Each area is represented by a button with a plus sign and a close button (X). The "General" row shows a link to "8 more" areas. At the bottom right, there are "Cancel" and "Save" buttons.

Description	Level	Areas
Logistics	2	LOGISTICS x
Sales	3	SALES x
Purchase	5	PURCHASE x
General	0	SALES x 8 more
MRP	1	MRP x
Finance	4	FINANCE x

This is a partial screenshot of the SAP Business Rules configuration interface, showing the bottom portion of the table from the previous screenshot. The word "Public" is visible at the bottom left of the table area.

MASTER DATA SUITE - MAKE IT SIMPLE WITH SAAS**PURE CLEAN CORE**

- Familiar Fiori UX
 - Configurable to your needs
 - All custom logic and data stays in BTP
 - S/4HANA connections with only standard APIs
 - Supports all S/4HANA editions
 - SAP Store and Industry Cloud solution (Q3/24)
-

BENEFITS OF SOFTWARE AS A SERVICE

- SAP offers platform
 - Neomore provides the software
 - You bring the requirements and S/4
 - Easy deployment - "Plug n Play"
 - Easy and flexible to customize, maintain and upgrade
 - Predictable TCO with subscription model
-
